Running your own Penguin Tower server

- **c**an be done by opening a terminal and typing the following:
- \$ cd \$./opt/bin/ptower-server ./opt/share/ptower/maps/star
- to stop the server, type ^C (press down the control key and then press the c key, now release both keys)
- there are a number of maps in the \$HOME/opt/share/penguintower/maps directory
 - m1, star and glover
 - star is the smallest (5 rooms)
